Author index for papers in Volume 36

Pages are numbered consecutively through the volume: 1–136, January; 137–325, March; 327–529, May; 531–816, July; 817–955, September; and 957–1052, November.

Ackerman, D. F., M. H. Decker, J. J. Gosselin, K. M. Lasko, M. P. Mullen, R. E. Rosa, E. V. Valera, and B. Wile
751 *Simulation of IBM Enterprise System/9000 Models 820 and 900*

Alt, P. M., C. G. Powell, B. L. Owens, Jr., and H. Ifill
11 *A gray-scale addressing technique for thin-film-transistor/liquid crystal displays*

Antonacci, F. and C. M. Calamani
333 *Capturing the deep meaning of texts through deduction and inference*

Apté, C. V., R. A. Dionne, J. H. Griesmer, M. Karnaugh, J. K. Kastner, M. M. Laker, and E. K. Mays
409 *An experiment in constructing an open expert system using a knowledge substrate*

Askawa, Y., H. Komatsu, H. Etoh, Y. Hama, and K. Maruyama
391 *Zephyr: Toward true compiler-based programming in Prolog*

Aulet, N. R., D. W. Boerstler, G. DeMario, F. D. Ferraiolo, C. E. Hayward, C. D. Heath, A. L. Huffman, W. R. Kelly, G. W. Peterson, and D. J. Stigliani, Jr.
553 *IBM Enterprise Systems multimode fiber optic technology*

Baccarani, G.
208 see Lee, W.

Bahr, J. E., S. B. Levenstein, L. A. McMahon, T. J. Mullins, and A. H. Wottreng
1001 *Architecture, design, and performance of Application System/400 (AS/400) multiprocessors*

Barish, A. E., J. P. Eckhardt, M. D. Mayo, W. A. Svarczkopf, and S. P. Gaur
829 *Improved performance of IBM Enterprise System/9000 bipolar logic chips*

Batson, P. E.
183 see Kuan, T. S.

Beckham, K. F.
921 see Brofman, P. J.

Beierle, C.
375 *Logic programming with typed unification and its realization on an abstract machine*

Boerstler, D. W.
553 see Aulet, N. R.

Bollinger, T. and U. Pletat
965 *Knowledge in operation*

Boone, L. E., M. R. Brinthaupt, J. A. Malack, and J. Pavlik
943 *Aspects of the electrical design and analyses of the printed circuit boards of the IBM Enterprise System/9000 water-cooled processors*

Booth, R. M., Jr., K. A. Tallman, T. J. Wiltshire, and P. L. Yee
835 *A statistical approach to quality control of non-normal lithographical overlay distributions*

Bordonaro, D. T.
233 see Rubloff, G. W.

Bossen, D. C.
765 see Chen, C. L.

Brinthaupt, M. R.
943 see Boone, L. E.

Brofman, P. J., S. K. Ray, and K. F. Beckham
921 *Electrical connections to the thermal conduction modules of the IBM Enterprise System/9000 water-cooled processors*

Brown, K. H., D. A. Grose, R. C. Lange, T. H. Ning, and P. A. Totta
821 *Advancing the state of the art in high-performance logic and array technology*

Bunce, P., W. Chin, L. Clark, and B. Krumm
859 *Directory and Trace memory chip with active discharge cell*

Calamani, C. M.
333 see Antonacci, F.

Calta, S. A., J. A. deVeer, E. Loizides, and R. N. Strangwayes
535 *Enterprise Systems Connection (ESCON) Architecture—System overview*

Casanova, M. A., A. S. Hemerly, and R. A. de T. Guerreiro
347 *Explaining SLDNF resolution with non-normal defaults*

Casanova, M. A.
361 see Guerreiro, R. A. de T.

Casper, D. F.
617 see Flanagan, J. R.

Chen, C. L., N. N. Tendolkar, A. J. Sutton, M. Y. Hsiao, and D. C. Bossen
765 *Fault-tolerance design of the IBM Enterprise System/9000 Type 9021 processors*

Chin, W.
859 see Bunce, P.

Chiu, K., J. J. DeFazio, and T. G. McNamara
867 *IBM Enterprise System/9000 clock system: A technology and system perspective*

Chiu, G. T.
845 see Guthrie, W. L.

Clark, L.
859 see Bunce, P.

Coleman, J. J., C. B. Meltzer, and J. L. Weiner
647 *Fiber Distributed Data Interface attachment to System/390*

Covi, K. R.
781 *Three-loop feedback control of fault-tolerant power supplies in IBM Enterprise System/9000 processors*

Crabbé, E. F.
208 see Lee, W.

Cwiakala, R., J. D. Haggar, and H. M. Yudenfriend
633 *MVS Dynamic Reconfiguration Management*

Dao-Trong, S. and K. Helwig
733 *A single-chip IBM System/390 floating-point processor in CMOS*

Davidson, E. E., P. W. Hardin, G. A. Katopis, M. G. Nealon, and L. L. Wu
877 *Physical and electrical design features of the IBM Enterprise System/9000 circuit module*

Decker, M. H.
751 see Ackerman, D. F.

DeFazio, J. J.
867 see Chiu, K.

Del Buono, M.
487 see Di Zenzo, S.

Delia, D. J., T. C. Gilgert, N. H. Graham, U. Hwang, P. W. Ing, J. C. Kan, R. G. Kemink, G. C. Maling, R. F. Martin, K. P. Moran, J. R. Reyes, R. R. Schmidt, and R. A. Steinbrecher
791 *System cooling design for the water-cooled IBM Enterprise System/9000 processors*

DeMario, G.
553 see Aulet, N. R.

deVeer, J. A.
535 see Calta, S. A.

Dhondy, Noshir R., Richard J. Schmalz, Ronald M. Smith, Sr., Julian Thomas, and Phil Yeh
655 *Coordination of time-of-day clocks among multiple systems*

Di Zenzo, S., M. Del Buono, M. Meucci, and A. Spirito
487 *Optical recognition of hand-printed characters of any size, position, and orientation*

Dionne, R. A.
409 see Apté, C. V.

Eckhardt, J. P.
829 see Barish, A. E.

Elliott, J. C. and M. W. Sachs
577 *The IBM Enterprise Systems Connection (ESCON) Architecture*

Etoh, H.
391 see Asakawa, Y.

Fahey, P. M., S. R. Mader, S. R. Stiffler, R. L. Mohler, J. D. Mis, and J. A. Slinkman
158 *Stress-induced dislocations in silicon integrated circuits*

Feenstra, R. M.
183 see Kuan, T. S.

Ferraiolo, F. D.
553 see Aulet, N. R.

Fischetti, M. V.
208 see Lee, W.

Flanagan, J. R., T. A. Gregg, and D. F. Casper
617 *The IBM Enterprise Systems Connection (ESCON) channel—A versatile building block*

Fujimoto, Y.
76 *Study of the V_{th} shift of the thin-film transistor by the bias temperature stress test*

Fukunaga, T.
43 see Koseki, T.

Fulton, J. J.
905 see Kranik, J. R.

Fury, M. A.
845 see Guthrie, W. L.

Gaur, S. P.
829 see Barish, A. E.

Georgiou, C. J., T. A. Larsen, P. W. Oakhill, and B. Salimi
593 *The IBM Enterprise Systems Connection (ESCON) Director: A dynamic switch for 200Mb/s fiber optic links*

Gibson, D. H. and G. S. Rao
695 *Design of the IBM System/390 computer family for numerically intensive applications: An overview for engineers and scientists*

Gilgert, T. C.
791 see Delia, D. J.

Gnudi, A.
208 see Lee, W.

Gosselin, J. J.
751 see Ackerman, D. F.

Goth, G. F., M. L. Zumbrunnen, and K. P. Moran
805 *Dual-tapered-piston (DTP) module cooling for IBM Enterprise System/9000 systems*

Graham, N. H.
791 see Delia, D. J.

Gregg, T. A.
617 see Flanagan, J. R.

Griesmer, J. H.
409 see Apté, C. V.

Grose, D. A.
821 see Brown, K. H.

Guerreiro, R. A. de T., A. S. Hemerly, and M. A. Casanova
361 *STORK and PENGUIN: Logic programming systems using general clauses and defaults*

Guerreiro, R. A. de T.
347 see Casanova, M. A.

Guthrie, W. L., W. J. Patrick, E. Levine, H. C. Jones, E. A. Mehter, T. F. Houghton, G. T. Chiu, and M. A. Fury
845 *A four-level VLSI bipolar metallization design with chemical–mechanical planarization*

Haggar, J. D.
633 see Cwiakala, R.

Hama, Y.
391 see Asakawa, Y.

Hardin, P. W.
877 see Davidson, E. E.

Hatoh, H.
23 see Takano, H.

Hayward, C. E.
553 see Aulet, N. R.

Heath, C. D.
553 see Aulet, N. R.

Helwig, K.
733 see Dao-Trong, S.

Hemerly, A. S.
347 see Casanova, M. A.

Hemerly, A. S.
361 see Guerreiro, R. A. de T.

Herron, L. W.
889 see Tummala, R. R.

Houghton, T. F.
845 see Guthrie, W. L.

Howard, W. E.
3 *Thin-film-transistor/liquid crystal display technology—An introduction*

Hsiao, M. Y.
765 see Chen, C. L.

Huffman, A. L.
553 see Aulet, N. R.

Humenik, J. N., J. M. Oberschmidt, L. L. Wu, and S. G. Paull
935 *Low-inductance decoupling capacitor for the thermal conduction modules of the IBM Enterprise System/9000 processors*

Humenik, J. N.
889 see Tummala, R. R.

Hwang, U.
791 see Delia, D. J.

Ifill, H.
11 see Alt, P. M.

Ing, P. W.
791 see Delia, D. J.

Jenkins, L. C., R. J. Polastre, R. R. Troutman, and R. L. Wisnieff
59 *Functional testing of TFT/LCD arrays*

John, R. A.
51 see Lien, A.

Jones, H. C.
845 see Guthrie, W. L.

Kan, J. C.
791 see Delia, D. J.

Karnaugh, M.
409 see Apté, C. V.

Kastner, J. K.
409 see Apté, C. V.

Katopis, G. A.
877 see Davidson, E. E.

Kellner, B. M.
889 see Tummala, R. R.

Kelly, W. R.
553 see Aulet, N. R.

Kemink, R. G.
791 see Delia, D. J.

Knickerbocker, J. U.
889 see Tummala, R. R.

Knickerbocker, S. H.
889 see Tummala, R. R.

Komatsu, H.
391 see Asakawa, Y.

Koseki, T., T. Fukunaga, H. Yamanaka, and T. Ueki
43 *Color filter for 10.4-in-diagonal 4096-color thin-film-transistor liquid crystal displays*

Kranik, J. R., J. J. Fulton, L. Su, and S. M. Zimmerman
905 *Equipment-related advances in the fabrication of glass-ceramic/copper/polyimide substrates*

Krumm, B.
859 see Bunce, P.

Kuan, T. S., P. E. Batson, R. M. Feenstra, A. J. Slavin, and R. M. Tromp
183 *Application of electron and ion beam analysis techniques to microelectronics*

Kumar, M.
990 *Unique design concepts in GF11 and their impact on performance*

Kuo, Y.
69 *Reactive ion etching technology in thin-film-transistor processing*

Laker, M. M.
409 see Apté, C. V.

Lange, R. C.
821 see Brown, K. H.

Larsen, T. A.
593 see Georgiou, C. J.

Lasko, K. M.
751 see Ackerman, D. F.

Laux, S. E.
208 see Lee, W.

Lee, W., S. E. Laux, M. V. Fischetti, G. Baccarani, A. Gnudi, J. M. C. Stork, J. A. Mandelman, E. F. Crabbé, M. R. Wordeman, and F. Odeh
208 *Numerical modeling of advanced semiconductor devices*

Levenstein, S. B.
1001 see Bahr, J. E.

Levine, E.
845 see Guthrie, W. L.

Lien, A. and R. A. John
51 *Lateral field effect in twisted nematic cells*

Liptay, J. S.
713 *Design of the IBM Enterprise System/9000 high-end processor*

Loizides, E.
535 see Calta, S. A.

Mader, S. R.
158 see Fahey, P. M.

Malack, J. A.
943 see Boone, L. E.

Maling, G. C.
791 see Delia, D. J.

Mandelman, J. A.
208 see Lee, W.

Martin, R. F.
791 see Delia, D. J.

Maruyama, K.
391 see Asakawa, Y.

Master, R. N.
889 see Tummala, R. R.

Mayo, M. D.
829 see Barish, A. E.

Mays, E. K.
409 see Apté, C. V.

McCarthy, John
329 see Wiederhold, Gio

McMahon, L. A.
1001 see Bahr, J. E.

McNamara, T. G.
867 see Chiu, K.

Mehter, E. A.
845 see Guthrie, W. L.

Meltzer, C. B.
647 see Coleman, J. J.

Meucci, M.
487 see Di Zenzo, S.

Mis, J. D.
158 see Fahey, P. M.

Mohler, R. L.
158 see Fahey, P. M.

Moran, K. P.
791 see Delia, D. J.

Moran, K. P.
805 see Goth, G. F.

Mullen, M. P.
751 see Ackerman, D. F.

Mullins, T. J.
1001 see Bahr, J. E.

Nealon, M. G.
877 see Davidson, E. E.

Neisser, M. O.
889 see Tummala, R. R.

Nguyen, T. N. and H. E. Stephanou
469 *Topological reasoning about dextrous grasps*

Nicholson, C. N.
958 *The controlled experiment in knowledge-acquisition research*

Ning, T. H.
821 see Brown, K. H.

Nufer, R. W.
889 see Tummala, R. R.

Nüse, R.
435 see Wetter, T.

Oakhill, P. W.
593 see Georgiou, C. J.

Oberschmidt, J. M.
935 see Humenik, J. N.

Odeh, F.
208 see Lee, W.

Oehrlein, G. S. and J. F. Rembetski
140 *Plasma-based dry etching techniques in the silicon integrated circuit technology*

Owens, B. L., Jr.
11 see Alt, P. M.

Patrick, W. J.
845 see Guthrie, W. L.

Paull, S. G.
935 see Humenik, J. N.

Pavlik, J.
943 see Boone, L. E.

Perry, C. H.
889 see Tummala, R. R.

Peterson, G. W.

Subject index for papers in Volume 36

Each index entry below is accompanied by an author's name and a page number; the author index contains the title of the paper and the names of coauthors, if any.

Subject	Author	Page
Artificial intelligence		
An experiment in construc:ing an open expert system using a knowledge substrate	Apté	409
Capturing the deep meaning of texts through deduction and inference	Antonacci	333
Explaining SLDNF resolution with non-normal defaults	Casanova	347
Knowledge in operation	Bollinger	965
Logic programming with typed unification and its realization on an abstract machine	Bierle	375
STORK and PENGUIN: Logic programming systems using general clauses and defaults	Guerreiro	361
The controlled experiment in knowledge-acquisition research	Nicholson	958
Topological reasoning about dextrous grasps	Nguyen	469
Use of natural language for knowledge acquisition: Strategies to cope with semantic and pragmatic variation	Wetter	435
Zephyr: Toward true compiler-based programming in Prolog	Asakawa	391
AS/400 computer		
Architecture, design, and performance of Application System/400 (AS/400) multiprocessors	Bahr	1001
Bipolar logic		
Improved performance of IBM Enterprise System/9000 bipolar logic chips	Barish	829
Bipolar transistors		
Advancing the state of the art in high-performance logic and array technology	Brown	821
Capacitors		
Low-inductance decoupling capacitor for the thermal conduction modules of the IBM Enterprise System/9000 processors	Humenik	935
Ceramics		
High-performance glass-ceramic/copper multilayer substrate with thin-film redistribution	Tummala	889
Channels		
The IBM Enterprise Systems Connection (ESCON) Architecture	Elliott	577
The IBM Enterprise Systems Connection (ESCON) channel—A versatile building block	Flanagan	617
Chem–mech planarization		
A four-level VLSI bipolar metallization design with chemical–mechanical planarization	Guthrie	845
Clock (computer)		
IBM Enterprise System/9000 clock system: A technology and system perspective	Chiu	867
Clock skew		
IBM Enterprise System/9000 clock system: A technology and system perspective	Chiu	867
Clock synchronization		
Coordination of time-of-day clocks among multiple systems	Dhondy	655
Clock system design		
IBM Enterprise System/9000 clock system: A technology and system perspective	Chiu	867

Color images
A gray-scale addressing technique for thin-film-transistor/liquid crystal displays — Alt 11
Cell design of gray-scale thin-film-transistor-driven liquid crystal displays — Takano 23
Color filter for 10.4-in.-diagonal 4096-color thin-film-transistor liquid crystal displays — Koseki 43

Computer architecture
Architecture, design, and performance of Application System/400 (AS/400) multiprocessors — Bahr 1001
Design of the IBM System/390 computer family for numerically intensive applications: An overview for engineers and scientists — Gibson 695
MVS/ESA coupled-systems considerations — Swanson 667
Unique design concepts in GF11 and their impact on performance — Kumar 990

Computer organization and design
Design of the IBM Enterprise System/9000 high-end processor — Liptay 713
Design of the IBM System/390 computer family for numerically intensive applications: An overview for engineers and scientists — Gibson 695
Fault-tolerance design of the IBM Enterprise System/9000 Type 9021 processors — Chen 765
MVS Dynamic Reconfiguration Management — Cwiakala 633
MVS/ESA coupled-systems considerations — Swanson 667
Simulation of IBM Enterprise System/9000 Models 820 and 900 — Ackerman 751

Computer-system availability
Fault-tolerance design of the IBM Enterprise System/9000 Type 9021 processors — Chen 765
MVS Dynamic Reconfiguration Management — Cwiakala 633

Cryptography
Integrated Cryptographic Facility of the Enterprise Systems Architecture/390: Design considerations — Smith 683

Data structure and accessing
MVS Dynamic Reconfiguration Management — Cwiakala 633

Differential current switch (DCS)
Improved performance of IBM Enterprise System/9000 bipolar logic chips — Barish 829

Dislocation generation
Stress-induced dislocations in silicon integrated circuits — Fahey 158

Display technology
A gray-scale addressing technique for thin-film-transistor/liquid crystal displays — Alt 11
Cell design of gray-scale thin-film-transistor-driven liquid crystal displays — Takano 23
Color filter for 10.4-in.-diagonal 4096-color thin-film-transistor liquid crystal displays — Koseki 43
Functional testing of TFT/LCD arrays — Jenkins 59
Lateral field effect in twisted nematic cells — Lien 51
Thin-film-transistor/liquid crystal display technology—An introduction — Howard 3

Electrical connection
Electrical connections to the thermal conduction modules of the IBM Enterprise System/9000 water-cooled processors — Brofman 921

Electrical design
Aspects of the electrical design and analyses of the printed circuit boards of the IBM Enterprise System/9000 water-cooled processors — Boone 943

Emitter-coupled logic (ECL)
Improved performance of IBM Enterprise System/9000 bipolar logic chips — Barish 829

Enterprise Systems
Coordination of time-of-day clocks among multiple systems — Dhondy 655
Design of the IBM Enterprise System/9000 high-end processor — Liptay 713
Design of the IBM System/390 computer family for numerically intensive applications: An overview for engineers and scientists — Gibson 695
Integrated Cryptographic Facility of the Enterprise Systems Architecture/390: Design considerations — Smith 683
MVS Dynamic Reconfiguration Management — Cwiakala 633
MVS/ESA coupled-systems considerations — Swanson 667
Physical and electrical design features of the IBM Enterprise System/9000 circuit module — Davidson 877
The IBM Enterprise Systems Connection (ESCON) Architecture — Elliott 577
The IBM Enterprise Systems Connection (ESCON) channel—A versatile building block — Flanagan 617
The IBM Enterprise Systems Connection (ESCON) Director: A dynamic switch for 200Mb/s fiber optic links — Georgiou 593

ESCON architecture
The IBM Enterprise Systems Connection (ESCON) Architecture — Elliott 577

The IBM Enterprise Systems Connection (ESCON) channel—A versatile building block — Flanagan 617
The IBM Enterprise Systems Connection (ESCON) Director: A dynamic switch for 200Mb/s fiber optic links — Georgiou 593

Expert systems
An experiment in constructing an open expert system using a knowledge substrate — Apté 409
The controlled experiment in knowledge-acquisition research — Nicholson 958

Fault-tolerant power systems
Three-loop feedback control of fault-tolerant power supplies in IBM Enterprise System/9000 processors — Covi 781

Feedback control
Three-loop feedback control of fault-tolerant power supplies in IBM Enterprise System/9000 processors — Covi 781

Fiber optics
The IBM Enterprise Systems Connection (ESCON) Architecture — Elliott 577
The IBM Enterprise Systems Connection (ESCON) Director: A dynamic switch for 200Mb/s fiber optic links — Georgiou 593

Field-effect transistors
Reactive ion etching technology in thin-film-transistor processing — Kuo 69
Study of the V_{th} shift of the thin-film transistor by the bias temperature stress test — Fujimoto 76

GF11 computer
Unique design concepts in GF11 and their impact on performance — Kumar 990

Heat transfer
Dual-tapered-piston (DTP) module cooling for IBM Enterprise System/9000 systems — Goth 805
System cooling design for the water-cooled IBM Enterprise System/9000 processors — Delia 791

Image processing
TDI charge-coupled devices: Design and applications — Wong 83

Input/output systems
The IBM Enterprise Systems Connection (ESCON) Architecture — Elliott 577
The IBM Enterprise Systems Connection (ESCON) channel—A versatile building block — Flanagan 617
The IBM Enterprise Systems Connection (ESCON) Director: A dynamic switch for 200Mb/s fiber optic links — Georgiou 593

Integrated circuit design
A single-chip IBM System/390 floating-point processor in CMOS — Dao-Trong 733
Directory and Trace memory chip with active discharge cell — Bunce 859
Improved performance of IBM Enterprise System/9000 bipolar logic chips — Barish 829

Interconnection design
A four-level VLSI bipolar metallization design with chemical–mechanical planarization — Guthrie 845

Interconnection processing
A four-level VLSI bipolar metallization design with chemical–mechanical planarization — Guthrie 845

Interconnection technology
Enterprise Systems Connection (ESCON) Architecture—System overview — Calta 535
Fiber Distributed Data Interface attachment to System/390 — Coleman 647
IBM Enterprise Systems multimode fiber optic technology — Aulet 553
The IBM Enterprise Systems Connection (ESCON) Director: A dynamic switch for 200Mb/s fiber optic links — Georgiou 593

Interface analysis
Application of electron and ion beam analysis techniques to microelectronics — Kuan 183

I/O architecture
MVS Dynamic Reconfiguration Management — Cwiakala 633

Lithography
A statistical approach to quality control of non-normal lithographical overlay distributions — Booth 835
Advancing the state of the art in high-performance logic and array technology — Brown 821

Logic
A single-chip IBM System/390 floating-point processor in CMOS — Dao-Trong 733
Simulation of IBM Enterprise System/9000 Models 820 and 900 — Ackerman 751

Logic programming
Capturing the deep meaning of texts through deduction and inference — Antonacci 333
Explaining SLDNF resolution with non-normal defaults — Casanova 347
Logic programming with typed unification and its realization on an abstract machine — Beierle 375
STORK and PENGUIN: Logic programming systems using general clauses and defaults — Guerreiro 361
Zephyr: Toward true compiler-based programming in Prolog — Asakawa 391

Manufacturing
Equipment-related advances in the fabrication of glass-ceramic/copper/polyimide substrates — Kranik 905

Mechanical design
Equipment-related advances in the fabrication of glass-ceramic/copper/polyimide substrates — Kranik 905

Microelectronics manufacturing
Integrated processing for microelectronics science and technology — Rubloff 233

Module design
Physical and electrical design features of the IBM Enterprise System/9000 circuit module — Davidson 877

Module testing
Functional testing of TFT/LCD arrays — Jenkins 59

Multilevel interconnections
A four-level VLSI bipolar metallization design with chemical–mechanical planarization — Guthrie 845
Advancing the state of the art in high-performance logic and array technology — Brown 821
Physical and electrical design features of the IBM Enterprise System/9000 circuit module — Davidson 877

Multiprocessing
Architecture, design, and performance of Application System/400 (AS/400) multiprocessors — Bahr 1001

Natural language processing
Capturing the deep meaning of texts through deduction and inference — Antonacci 333
Knowledge in operation — Bollinger 965
Use of natural language for knowledge acquisition: Strategies to cope with semantic and pragmatic variation — Wetter 435

Networks
Fiber Distributed Data Interface attachment to System/390 — Coleman 647

Optical transmission
Enterprise Systems Connection (ESCON) Architecture—System overview — Calta 535
IBM Enterprise Systems multimode fiber optic technology — Aulet 553

Optoelectronic device technology
Color filter for 10.4-in.-diagonal 4096-color thin-film-transistor liquid crystal displays — Koseki 43
Lateral field effect in twisted nematic cells — Lien 51
Thin-film-transistor/liquid crystal display technology—An introduction — Howard 3

Overlay tolerance
A statistical approach to quality control of non-normal lithographical overlay distributions — Booth 835

Oxidation-induced stress
Stress-induced dislocations in silicon integrated circuits — Fahey 158

Packaging
Aspects of the electrical design and analyses of the printed circuit boards of the IBM Enterprise System/9000 water-cooled processors — Boone 943
Electrical connections to the thermal conduction modules of the IBM Enterprise System/9000 water-cooled processors — Brofman 921
Equipment-related advances in the fabrication of glass-ceramic/copper/polyimide substrates — Kranik 905
High-performance glass-ceramic/copper multilayer substrate with thin-film redistribution — Tummala 889
Low-inductance decoupling capacitor for the thermal conduction modules of the IBM Enterprise System/9000 processors — Humenik 935
Physical and electrical design features of the IBM Enterprise System/9000 circuit module — Davidson 877

Parallel processing
Architecture, design, and performance of Application System/400 (AS/400) multiprocessors — Bahr 1001
Unique design concepts in GF11 and their impact on performance — Kumar 990

Performance measurement and prediction
Functional testing of TFT/LCD arrays — Jenkins 59
Simulation of IBM Enterprise System/9000 Models 820 and 900 — Ackerman 751

Photodetectors
TDI charge-coupled devices: Design and applications — Wong 83

Plasma-based anisotropic etching
Plasma-based dry etching techniques in the silicon integrated circuit technology — Oehrlein 140

Power control system
Three-loop feedback control of fault-tolerant power supplies in IBM Enterprise System/9000 processors — Covi 781

Power supplies
Three-loop feedback control of fault-tolerant power supplies in IBM Enterprise System/9000 high-end processors — Covi 781

Process-induced defects
Application of electron and ion beam analysis techniques to microelectronics — Kuan 183

Processor design
Design of the IBM Enterprise System/9000 high-end processor — Liptay 713

Quality control
A statistical approach to quality control of non-normal lithographical overlay distributions — Booth 835

Robotics
Topological reasoning about dextrous grasps — Nguyen 469

Semiconductor device modeling
Numerical modeling of advanced semiconductor devices — Lee 208

Semiconductor device processing
Integrated processing for microelectronics science and technology — Rubloff 233
Plasma-based dry etching techniques in the silicon integrated circuit technology — Oehrlein 140

Semiconductor devices
Application of electron and ion beam analysis techniques to microelectronics — Kuan 183
Numerical modeling of advanced semiconductor devices — Lee 208
Stress-induced dislocations in silicon integrated circuits — Fahey 158
Study of the V_{th} shift of the thin-film transistor by the bias temperature stress test — Fujimoto 76

Semiconductor technology
A single-chip IBM System/390 floating-point processor in CMOS — Dao-Trong 733
Advancing the state of the art in high-performance logic and array technology — Brown 821
Directory and Trace memory chip with active discharge cell — Bunce 859
Reactive ion etching technology in thin-film-transistor processing — Kuo 69
Unique design concepts in GF11 and their impact on performance — Kumar 990

Simulation
Simulation of IBM Enterprise System/9000 Models 820 and 900 — Ackerman 751

Substrates
Physical and electrical design features of the IBM Enterprise System/9000 circuit module — Davidson 877

Surface analysis
Application of electron and ion beam analysis techniques to microelectronics — Kuan 183

Switches
The IBM Enterprise Systems Connection (ESCON) Director: A dynamic switch for 200Mb/s fiber optic links — Georgiou 593

Sysplex timer
Coordination of time-of-day clocks among multiple systems — Dhondy 655

System cooling
System cooling design for the water-cooled IBM Enterprise System/9000 processors — Delia 791

System timing analysis
IBM Enterprise System/9000 clock system: A technology and system perspective — Chiu 867

Systems architecture and development
Design of the IBM System/390 computer family for numerically intensive applications: An overview for engineers and scientists — Gibson 695

Thermal conduction
System cooling design for the water-cooled IBM Enterprise System/9000 processors — Delia 791

Thermal conduction analysis
Dual-tapered-piston (DTP) module cooling for IBM Enterprise System/9000 systems — Goth 805

Thermal conduction module
Dual-tapered-piston (DTP) module cooling for IBM Enterprise System/9000 systems — Goth 805

Time-of-day clock
Coordination of time-of-day clocks among multiple systems — Dhondy 655

Timing relationships
IBM Enterprise System/9000 clock system: A technology and system perspective — Chiu 867

Vector computers
Design of the IBM System/390 computer family for numerically intensive applications: An overview for engineers and scientists — Gibson 695
Design of the IBM Enterprise System/9000 high-end processor — Liptay 713

VLSI
A single-chip IBM System/390 floating-point processor in CMOS — Dao-Trong 733

Water cooling
Dual-tapered-piston (DTP) module cooling for IBM Enterprise System/9000 systems — Goth 805
System cooling design for the water-cooled IBM Enterprise System/9000 processors — Delia 791
